## SUMMARY

- Hard worker, Creative, Trustworthy.
- Bachelor's degree in Software Engineering, providing a strong theoretical foundation and practical expertise in software design, algorithms, and problem-solving.
- Full Stack Developer with experience in ReactJS, Reacts, Django, Fast API, NodeJS, MongoDB, MySQL, PostgreSQL, AWS, and Docker.
- Experienced in developing end-to-end platforms focusing on gamification and personalization.
- Seeking a challenging role in a company that values quick learning and high-quality product development.

## EXPERIENCE & PROJECTS

### **2024 – Software Developer at Palm Robotics**

The company was established in order to provide a solution for pressing problem faced by date palm growers.

- **Role:** Full-Stack Developer / DevOps
- **Technologies:** React, Django, Fast API, PostgreSQL, AWS (EC2, S3), Dockers
- **Description:**
  - Developed and maintained robust web applications using React-typescript for frontend development, creating dynamic and responsive user interfaces.
  - Built scalable and high-performance server-side applications with Django and FastAPI, ensuring efficient backend processes.
  - Managed optimized PostgreSQL and MySQL databases for reliable and efficient data storage solutions.
  - Developed and managed applications on AWS , utilizing EC2 computing power and S3 for storage needs.

### **2023 – 2024: Full Stack Developer at Q-Master**

- **Role:** Full-stack Developer
- **Technologies:** React, Node.js, MongoDB, AWS (EC2, S3)
- **Description:** Developed a queue management platform enabling local business owners, such as barbershops, to efficiently manage customer queues. The platform streamlines queue management for both business owners and customers, enhancing the overall experience.

### **2022 – 2023: Full Stack Developer at Termi**

Termi is a startup company that aims to increase student's understanding of technical terms and knowledge. I was responsible for designing and building the front end using React and Redux, creating a strict authentication process using JWT, and building the back-end infrastructure using NodeJS. I worked with various cloud services for storage and deployment, collaborated with multiple engineers, and worked in an agile environment.

- Produced production-ready product that now is going towards 1<sup>st</sup> funding round.
- Got responsibility for task management, backlog, and sprints to ensure effective teamwork.

## EDUCATION

### **2018 – 2023: B.Sc. Software Engineering at Kinneret Academic College**

**Specialization:** Object-Oriented-Programming and Full Stack Development.

During my studies, I gained practical experience through projects that bridged the theoretical and practical gaps. I specialized in various technical skills, including:

- **Programing Languages:** Python, Java, JavaScript, TypeScript, C#, C/C++.
- **Technical Skills:**
  - **Front-end** - HTML, CSS, React, Angular, Redux, Bootstrap.
  - **Back-end** - NodeJS, Express, Django, FastAPI, and Sprint Boot.
  - **DB** – MongoDB, Firebase, SQL, SQL Server, MySQL, PostgreSQL.

Notable projects include:

- **Restaurant management platform** – manage inventory, orders, and customers, Developed with C# .NET Framework.
- **Linux-Based Shell with Signal Handling** - Developed a Linux-based shell with signal handling, utilizing low-level languages such as C and C ++.

### **2022 – 2023: QA & Automation Course at ATID Automation**

- Developed a strong foundation in Quality Assurance and Automation techniques.
- Proficiently used Python for test script development, enhancing automation efficiency.
- Gained expertise in Robot Framework for test case design, execution, and reporting.
- Acquired practical knowledge of test planning, test execution and defect tracking in real-world scenarios.
- Collaborated on team projects to create automation test suites for web and software applications, showcasing teamwork and problem-solving abilities.

## MILITARY SERVICE

### **2013-2016:**

Served as a combatant in the IDF with Gedud Heriv 299.
